## Long-term content blue chip investment

#### 2Q18 review

• Studio Dragon reported consolidated 2Q18 sales of W74.3bn (+20% YoY), OP of W7.3bn (-21% YoY), and NP (controlling interest) of W8.9bn (-8% YoY), with OP missing consensus by about 20%. The YoY drop in OP is attributable to base effect from solid overseas sales of "Stranger" in 2Q17, and CoGS growth, which outpaced TV drama sales growth. In detail, programming revenue rose 41% YoY to W34.1bn and distribution revenue 9% YoY to W28.8bn, while other revenue fell 2% YoY to W11.4bn. 1) The sharp rise in programming revenue indicates a higher number of productions and higher average production cost. 2) Domestic distribution revenue rose 21% YoY to W12.3bn, decent even after we factor in the increase in the number of series produced YoY. The company's productions are gaining more influence, as shown by the improvement in its average viewership from 2.7% in 2Q17 to 4.2% in 2Q18 (+1.5%p). 3) Overseas sales were stagnant at W16.5bn (+2% YoY) due to base effect from sales of "Stranger" to Netflix in 2Q17. In 2Q18, no Netflix sales were booked, and thus, overseas sales growth was slow and operating leverage lacking.
4) Meanwhile, the firm booked financial gains of W3.4bn, up W3.1bn YoY, which we attribute mostly to a higher KRW/USD and resultant FX translation gains.

#### Content blue chip for long-term investment

 We reiterate BUY and our target price of W114,000, implying a 2019E P/E of 34.5x. The firm stands to benefit most from the resumption of TV drama sales to Chinese OTT firms and Amazon Prime's entry into the Korean market. In addition, it has the biggest and best content creator pool in Korea. This enables it to produce original series for global OTT service providers and remake Korean hit series overseas (joint-productions with global media companies) as well as for its captive channels. This is why we believe Studio Dragon is a blue chip investors should have in their portfolios as a long-term play. We expect 2H18 OP to 295% YoY to W39.9bn for the following reasons. 1) 3Q18 OP will likely surge 220% YoY to W21.3bn thanks to "Mr. Sunshine," a 2018 blockbuster drama from prominent screen writer, Kim Eun-sook, Netflix is estimated to have paid at least W28.7bn (about W30.0bn in terms of estimated sales price), boosting operating leverage. 2) We estimate 4Q18 OP at W18.6bn (+436% YoY) even if we exclude sales to Chinese OTT players. In addition to "Memories of Alhambra" written by Song Jae-jeong, "Boyfriend," starring Song Hye-kyo and Park Bo-gum, has been added to the 4Q18 line-up. It will air on tvN in Nov 2018, boosting expectations for 4Q18 earnings. The production cost for the new series is said to be double the usual cost for a TV drama, and thanks to the popularity of actress Song Hye-kyo, Boyfriend will likely be priced highly in the overseas market.

Note: CI = controlling interest

EPS, BPS, P/E and P/B are based on controlling interest

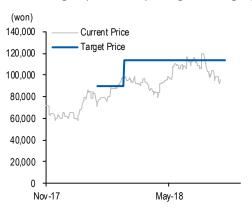

For valuation metrics such as P/E, historical figures are based on annual average prices and estimates, on current price

For ROA or ROE, assets and equity are averages of end-of-year figures for the given year and the year prior

#### **Analyst certification**

I/We, as the research analyst/analysts who prepared this research report, do hereby certify that the views expressed in this report accurately reflect my/our personal views about the subject securities discussed in this report.

#### Stock and sector ratings

- Stock ratings include an Investment Rating (Strong Buy, Buy, Hold, Sell) based on the expected absolute return of a stock over the next 6 -12 months.
- - Strong Buy: Expected to return 30% or more
  - Buy: Expected to return between 10% and 30%
  - Hold: Expected to return between -10 and +10%
  - Sell: Expected to return -10% or less
- Sector ratings suggest 6 to 12 month forward investment weighting of a given sector compared to its market capitalization weighting.
  - Overweight: Investment weighting is higher than the market capitalization weighting
  - Neutral: Investment weighting is equal to the market capitalization weighting
  - Underweight: Investment weighting is lower than the market capitalization weighting
